FIPAEN, december 06, 2007

# INFORMATION TO ACORDE

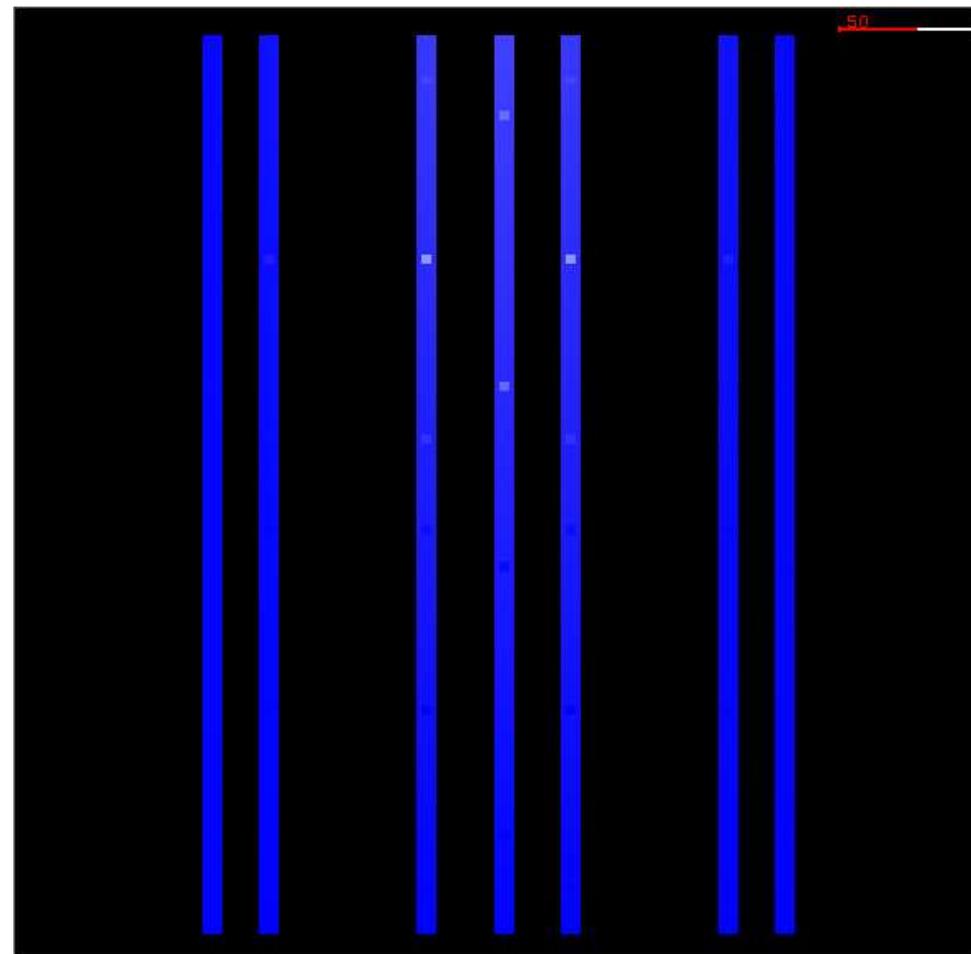

# *ACORDE SUPPORT*

*Support left face of magnet*

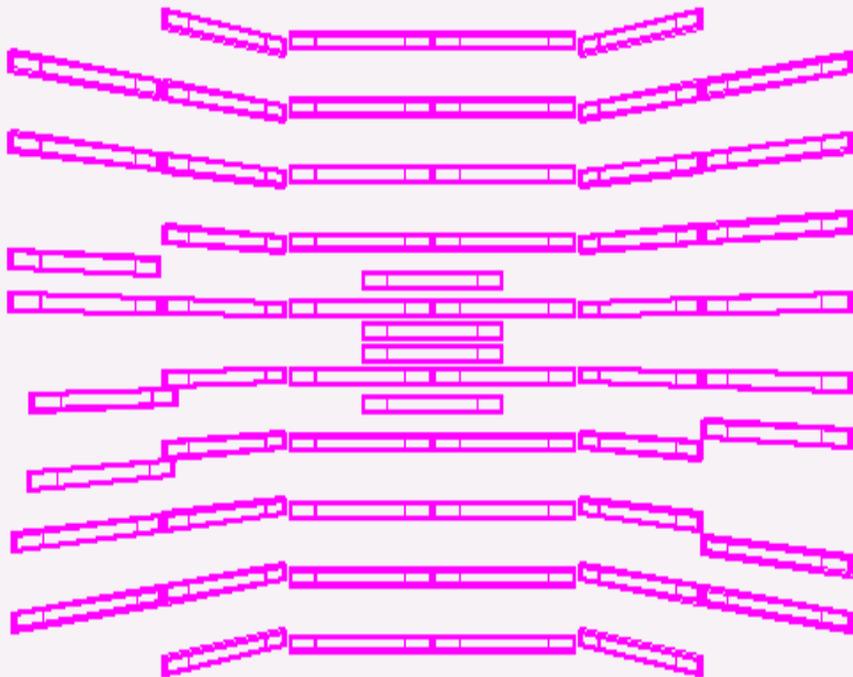

*Top of mangent*

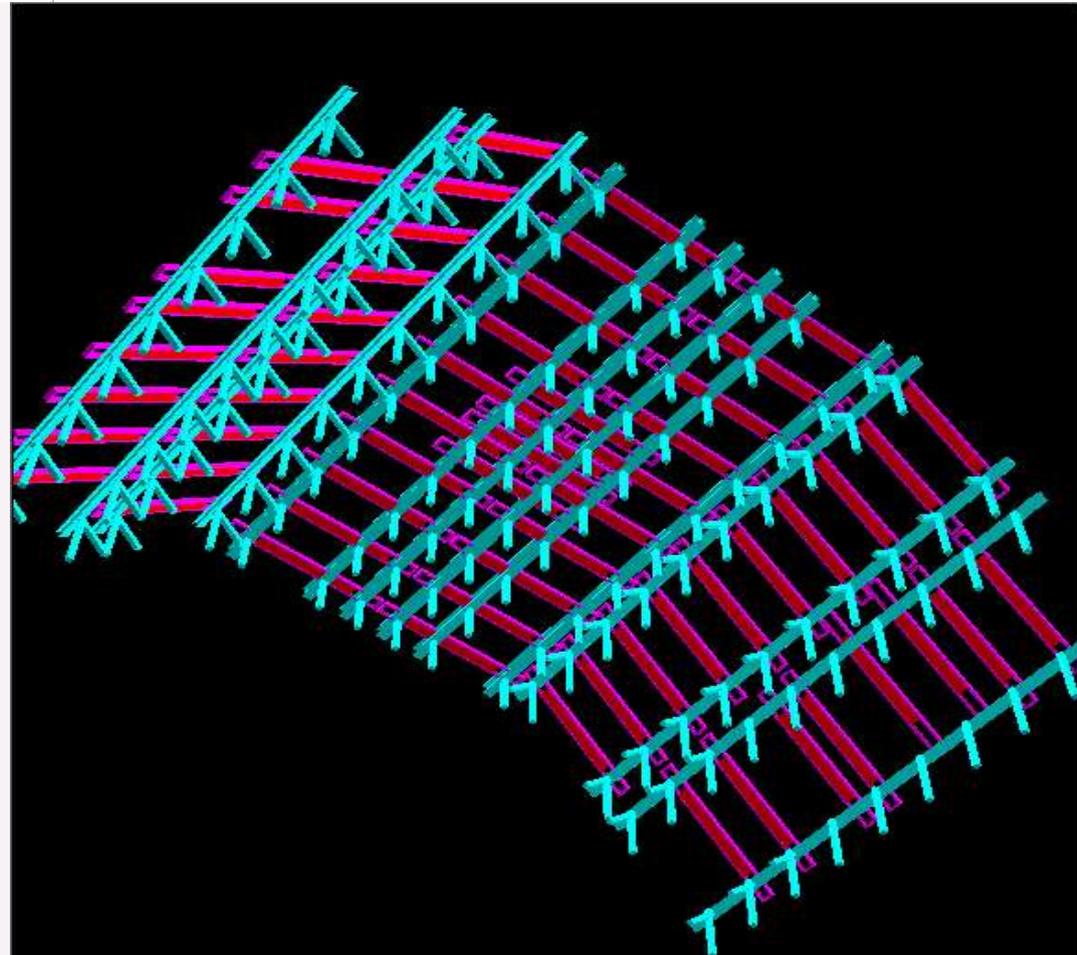

# ACORDE WITH AND WITHOUT SUPPORT

**Geometry without support**

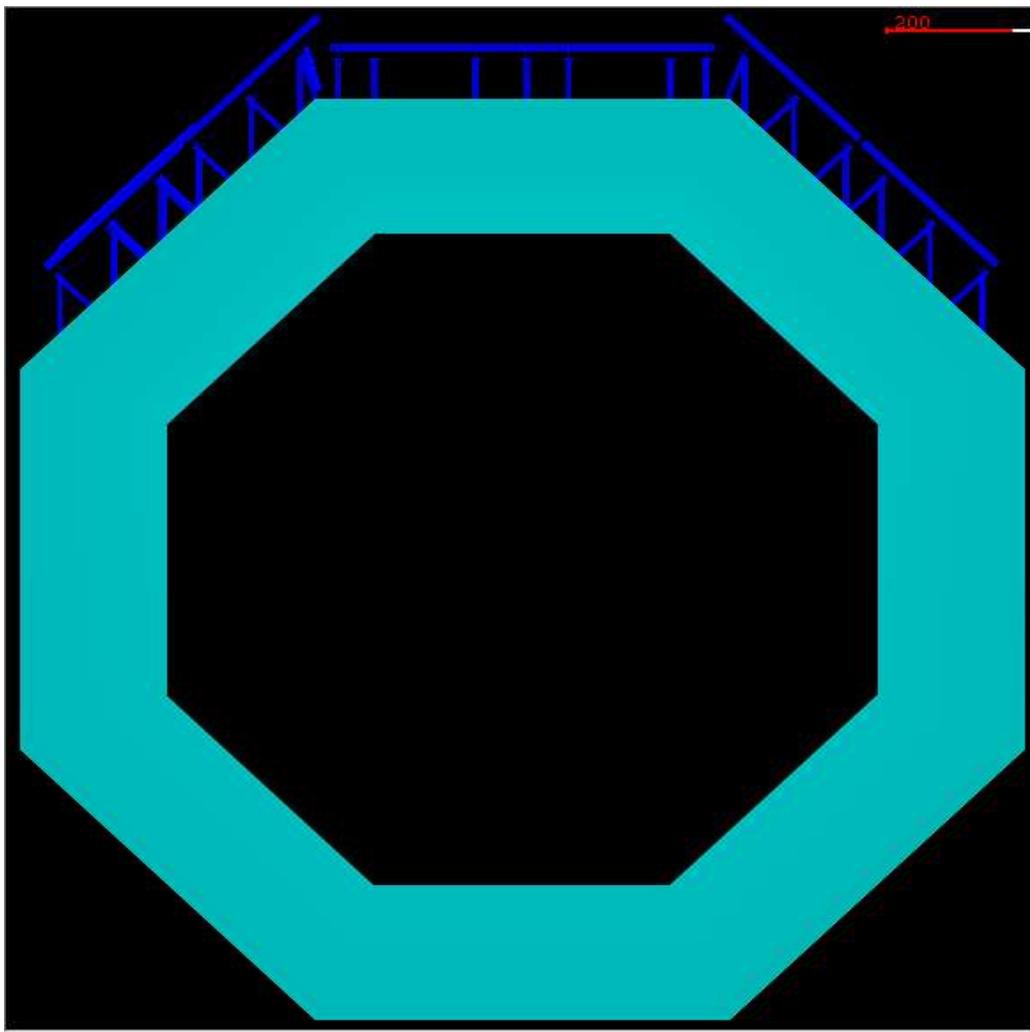

**Geometry with support**

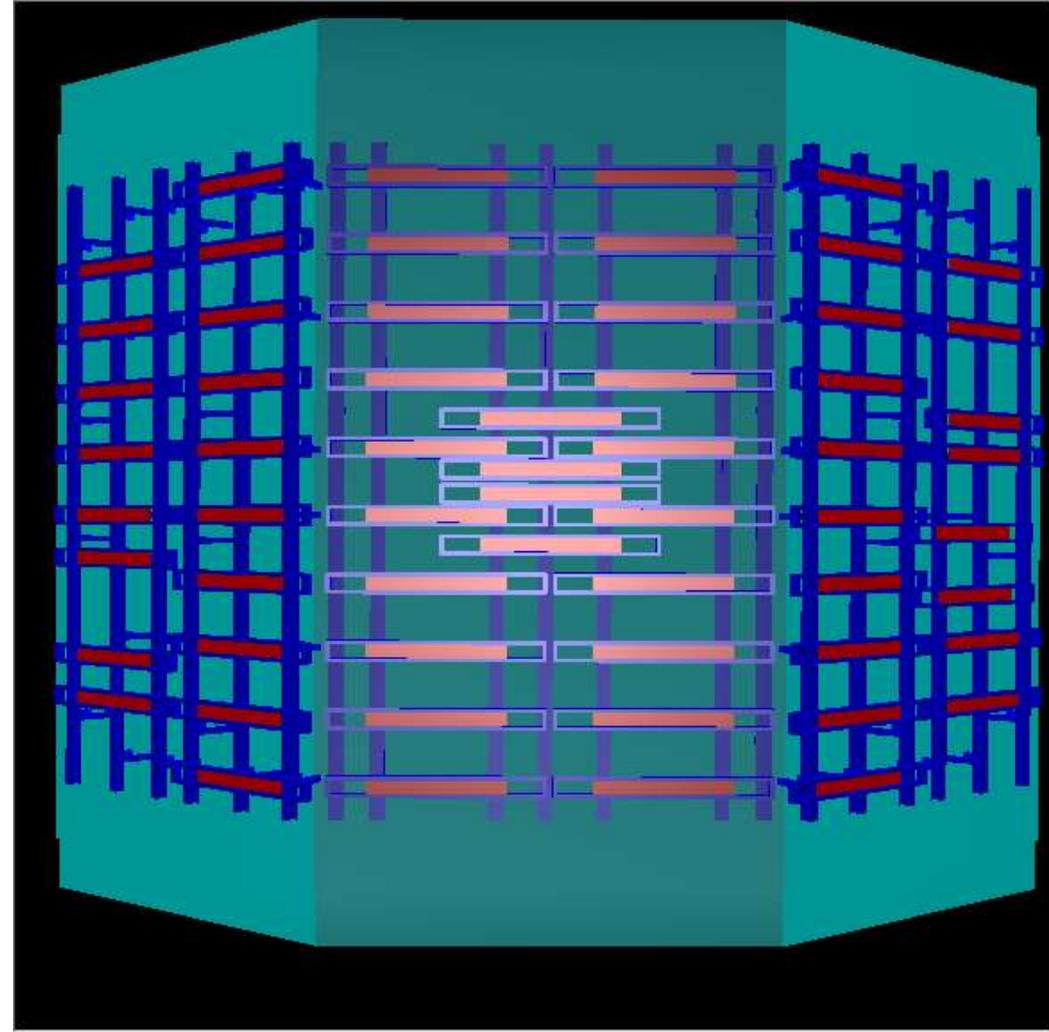

# ACORDE geometry on magnet

*Front view ACORDE+MAGNET*

*Top view: ACORDE+MAGNET*

# What were the changes?

*Goal:*

- *Implement the ACORDE support*
- *Change the geometry according to standard ALICE format (using TGeo Class). It means rewrite the class*

AliACORDEv0.cxx	====>	AliACORDEv1.cxx
AliACORDEv0.h	====>	AliACORDEv1.h
LibACORDEsim.pkg	====>	modified
LibACORDEsim.h	====>	modified

# Things to do:

Implementation of the **ACORDE support**, change from **Geant to TGeo Class** and introduce a **Mother Volume** to **ACORDE => change on:**

- **Geometry in ALIEVE (geom\_acorde.C)**
- **Hits in ALIEVE (hits\_acorde.C)**
- **sent to CVS**
- **Alignment**
