Experimental Overview on Heavy Quark Probes in Hot QCD Medium

Thursday, 14 September 2017 09:00 (0:25)

Content

This talk will summarize the latest experimental results in using heavy quarks to probe the Quark-Gluon Plasma created at RHIC and LHC. The presentation will include a discussion on the heavy quark production mechanisms, initial state effects in nucleus and final interaction with the hot and dense medium. A part of the talk will be dedicated to recent studies with bound state heavy-quarkonia behavior in the nuclear matter and what can we learn from these measurements to study nuclear matter properties.

Session

Hadronic final states in high pt interactions

Primary author(s) : Dr. DA SILVA, Cesar Luiz (Los Alamos National Lab)

Presenter(s) : Dr. DA SILVA, Cesar Luiz (Los Alamos National Lab)

Session Classification : Hadronic final states in high pT interactions (II)
