## Study of the event by event mean transverse momentum fluctuations in small collision systems at LHC energies with percolation color sources

*Monday, 11 September 2017 17:25 (0:05)*

### Content

We present a study of the event by event mean transverse momentum fluctuations in high multiplicity pp and p-Pb collision systems at LHC energies in the framework of the String Percolation Model as a function of multiplicity. We found that data can be naturally described by the clustering of color sources that take place in the small collision systems in a similar manner as it does in heavy ion collisions.

### Session

Poster sessions

**Primary author(s) :** Mr. FIERRO ROJAS, Pablo (BUAP FCFM)

**Co-author(s) :** Dr. BAUTISTA, irais (BUAP)

**Presenter(s) :** Mrs. ROBLES JACOBO, Cristal (FCFM-BUAP)

**Session Classification :** Flash Talks
