

Aspects of the QCD phase diagram

Thursday, 28 September 2017 18:00 (0:30)

Content

We review the status and perspectives of our group regarding facets of the QCD phase diagram from Schwinger-Dyson equations and Effective description of the said diagram within local, nonlocal and other variants of the NJL model.

Summary

Presenter(s) : Dr. RAYA, Alfredo (IFM-UMSNH)

Session Classification : WG Condiciones Extremas (Alejandro Ayala)
