

Preliminary hybrid data production @ Lecce farm

→ up to the end of 2017

Aerosol DB based on the work by the Adelaide group (Violet et al.)

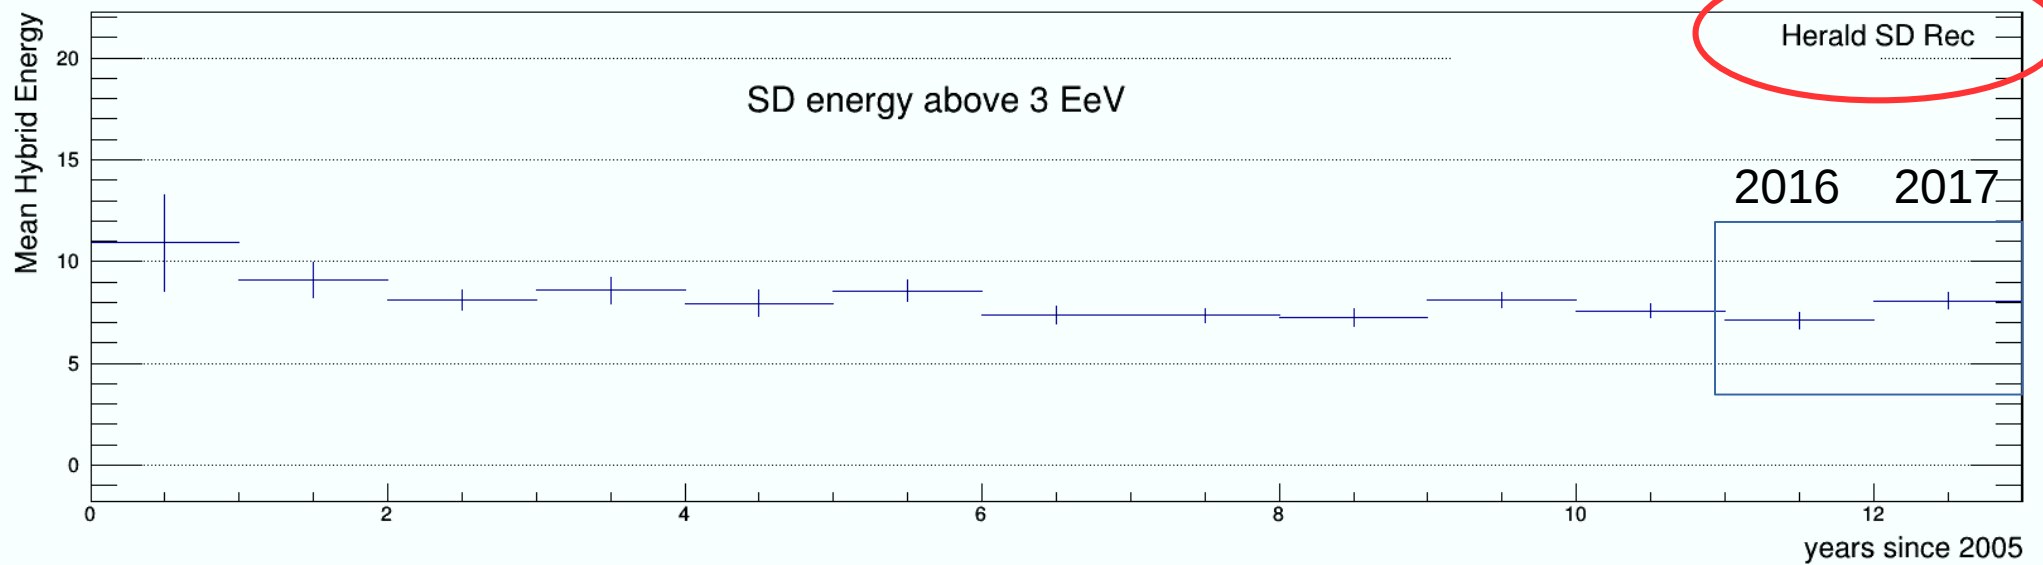

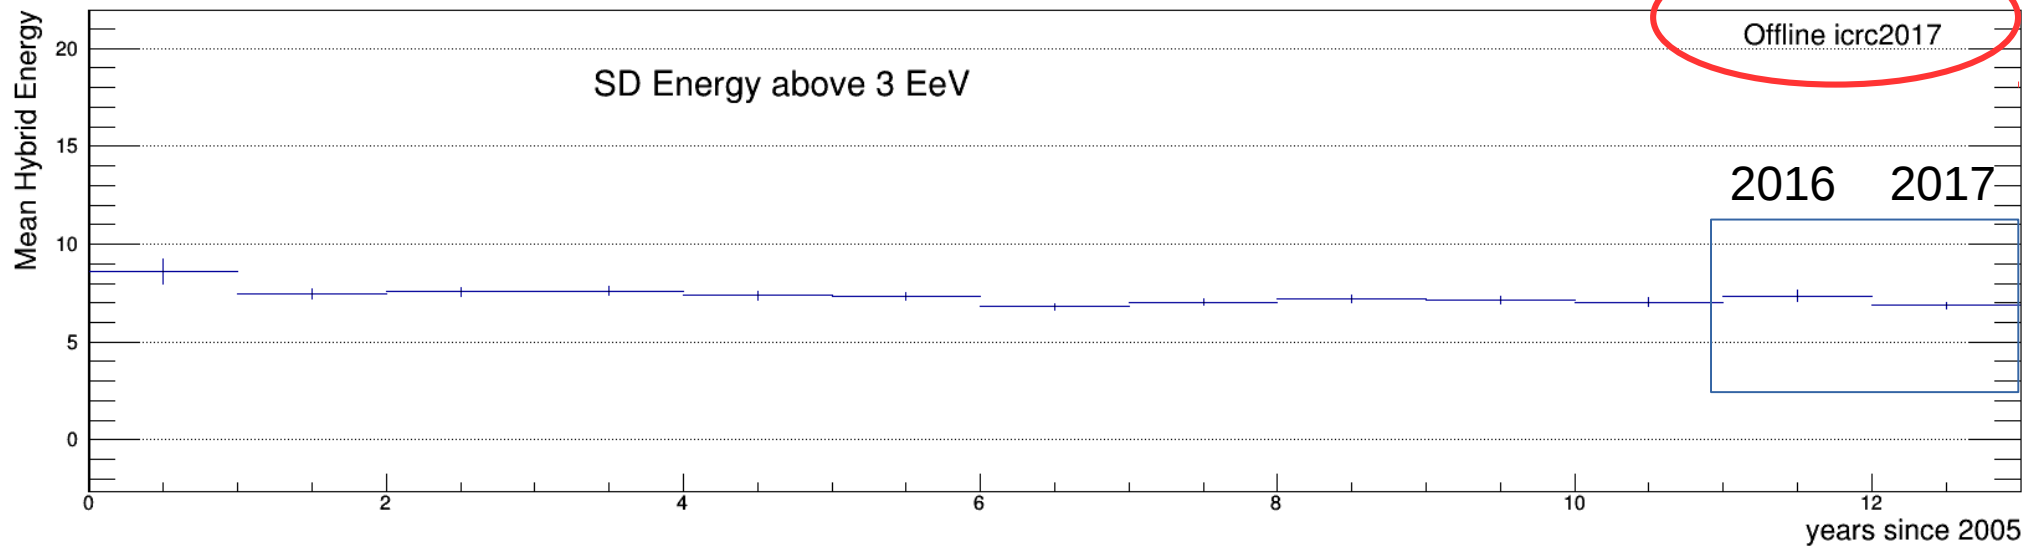

Cloud database updated (thanks Bruce et al)

WARNING: Offline used for this test: a branch post ICRC 2017

Test performed also on ADSTs with FD energy from offline
and SD energy from herald reconstruction (thanks Valerio)
Much smaller data set: tighter cuts applied

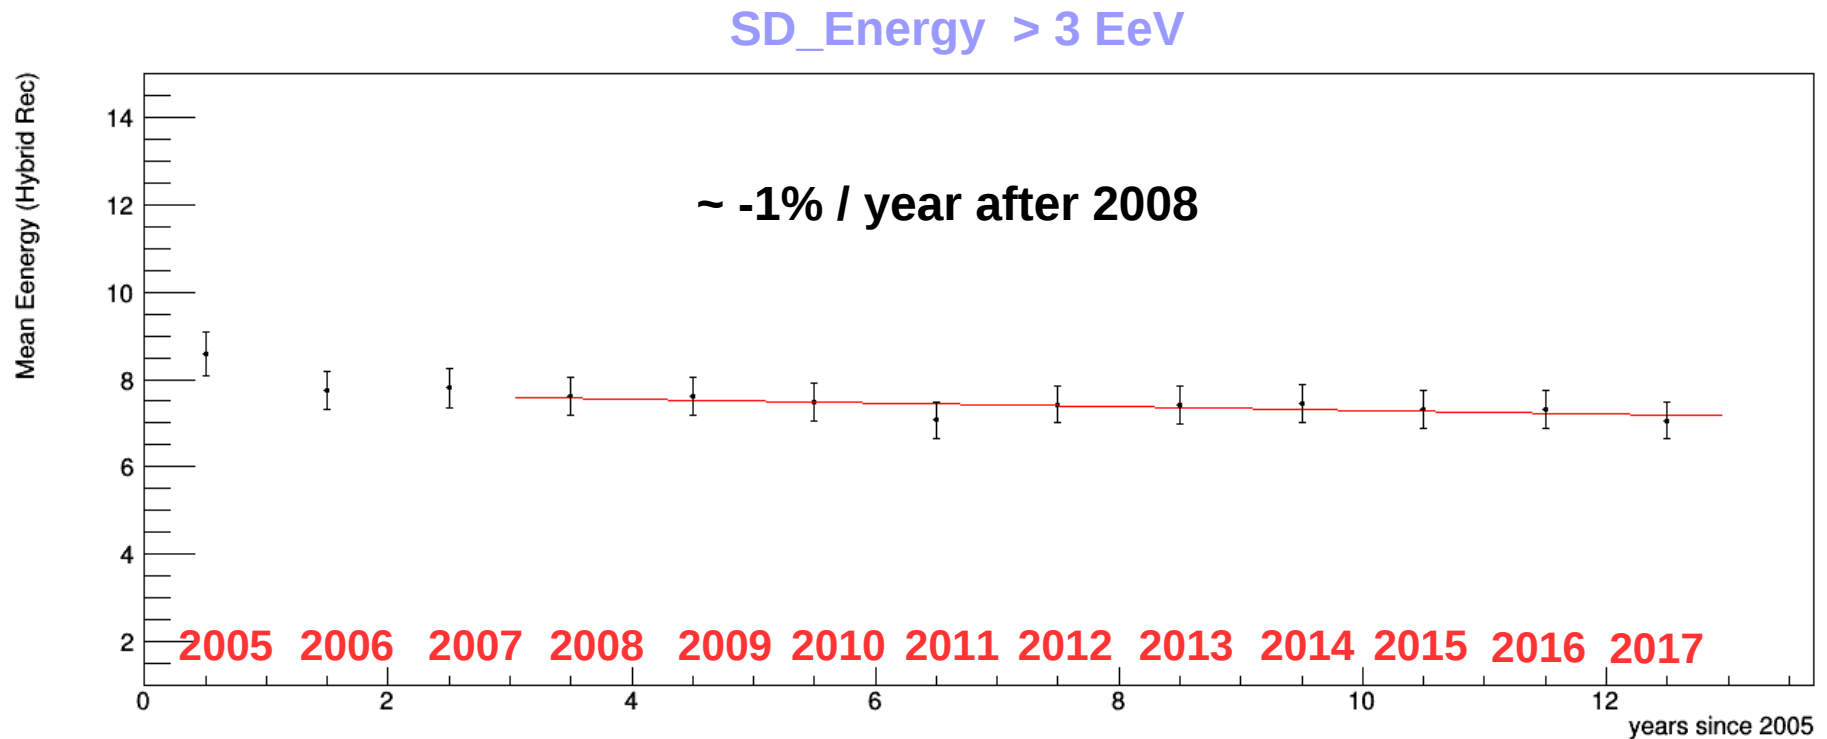

Work in progress. New production needed after the
incoming new version of Aerosol DB from Adelaide

Mean hybrid energy vs time

Energy scale Stability

Last hybrid pre-production for
ICRC 2017
Violet Aerosol and Calibration DB
No cloud cut

Preliminary: rather old offline version
