

Charm baryons at LHCb

Content

The LHCb experiment collected the world's largest sample of charmed hadrons during LHC Run 1 and Run 2. With this data set, LHCb is currently providing the world's most precise measurements of properties and production of known charmed baryons, as well as discovering many previously unobserved states. The latest results from the LHCb Collaboration on charmed baryons are presented

Summary

Primary author(s) : Prof. STEFANIA, Ricciardi (LHCb); Dr. BOBULSKA, Dana (Glasgow Univ.)
