

Ultra High Energy Cosmic Rays in the Pierre Auger Observatory Era

Thursday, 28 November 2019 09:00 (1:00)

Content

The Pierre Auger Observatory has been in operation for 15 years and has radically changed the view of Ultra High Energy Cosmic Rays within the community. I will summarize its results focussing on the large picture of where we stand in the field today compared to where we were when the project started, more than 20 years ago.

Summary

Presenter(s) : BERTOU, Xavier (Centro Atomico Bariloche)
