

Quarks, gluons and black holes

Monday, 9 November 2009 09:00 (1:00)

Abstract content

Summary

I will review the fascinating connection uncovered in recent years between the physics of the quark-gluon plasma created in heavy ion collisions and the physics of black holes in string theory. I will place special emphasis on the type of predictions and insights that the string description can offer. No previous knowledge of string theory is needed.
