

Latin American participation in intensity frontier experiments at FERMILAB

Monday, 9 November 2009 11:30 (1:00)

Abstract content

Summary

The intensity frontier experiments at Fermilab are THE future of the laboratory and, as such, are receiving considerable support from the US funding agencies as well as the laboratory. A description of the near-and-far future neutrino experiments as well as a short summary of the planned mu-to-e experiment will be presented. The success of the Latin American groups in the MINERvA experiment will be emphasized as a model on which Latin American groups can collaborate on future Intensity Frontier experiments from very early stages.

Presenter(s) : Dr. MORFIN, Jorge G. (Fermilab)

Session Classification : Review Session II
