

The Pierre Auger Observatory: status and results

Monday, 9 November 2009 17:30 (0:30)

Abstract content

Summary

The Pierre Auger Observatory is the world largest cosmic ray observatory. We present the status of the Pierre Auger Observatory, an update of its results, and plans for the future. In particular, we will present the spectrum of cosmic rays at the highest energies, results from the search for anisotropies and limits on the fluxes of neutrinos and photons at the highest energies.

Presenter(s) : Dr. NELLEN, Lukas (ICN-UNAM)

Session Classification : Neutrino Physics and Ultra High Energy Cosmic Ray Physics I
