

Towards Seeking θ_{13} : Status and Initial Data from T2K

Monday, 8 November 2010 16:30 (0:30)

Abstract content

T2K is a long-baseline neutrino oscillation experiment with the primary aim of measuring the smallest and most elusive neutrino mixing angle, θ_{13} . 2010 saw the beginning of the T2K data-taking phase. This presentation will give an overview of the T2K experiment, its goals and current status, and will show some of the initial data.

Summary

Primary author(s) : Dr. KORMOS, Laura (Lancaster University)

Co-author(s) : FOR THE T2K, Collaboration (T2K Collaboration)

Presenter(s) : Dr. KORMOS, Laura (Lancaster University)

Session Classification : Session I NU.CR

Track Classification : Neutrino physics and cosmic rays
