

## **Exceptional SU(2), Dark matter and Higgs signatures**

### **Abstract content**

In this talk we present an extension of the SM that contains a neutral SU(2) gauge group. This model admits a possible neutral, but complex, stable vector state, which can play the role of dark matter. The Higgs sector of the model can also give interesting signatures at LHC.

### **Summary**

**Primary author(s) :** Dr. DIAZ-CRUZ, Lorenzo (FCFM-BUAP)

**Presenter(s) :** Dr. DIAZ-CRUZ, Lorenzo (FCFM-BUAP)

**Session Classification :** Session II LHC.SM.BSM

**Track Classification :** LHC physics: Standard Model and Beyond
