

Prospects for an Accelerator Program in Mexico

Monday, 8 November 2010 11:30 (1:00)

Abstract content

Recent interest in developing an accelerator-based light source in Mexico has driven several actions by the Division of Particles and Fields in Mexico, and by the electron accelerator community in the United States. We report on actions taken over the last two years and on recent developments that are very encouraging and offer a variety of possibilities to start the development of an accelerator program in Mexico. A suggested path towards this goal that would eventually lead to building, commissioning and operating a third or fourth generation light source will also be presented.

Summary

Primary author(s) : Dr. HERNANDEZ-GARCIA, Carlos (Thomas Jefferson National Accelerator Facility)

Presenter(s) : Dr. HERNANDEZ-GARCIA, Carlos (Thomas Jefferson National Accelerator Facility)

Session Classification : Plenary I.E.PP

Track Classification : Instrumentation and experimental particle physics
