

Admissions Committee

Current members: Hermann Albrecht, Federico Muñoz & Pablo Roig (proposed chair).

We have invited Patricia Magalhaes and Joel Jones to join. We are very glad both have accepted.

Report: The admissions committee of LAA-HECAP (AC) has continued inviting active members in these topics of the LA community to join the association. This has been done both privately (when we noticed someone in particular was missing) and including the link to apply for membership, https://docs.google.com/forms/d/e/1FAIpQLSeY5pkzAMfmq-CjSlSdg3L3FZHTwMX667HHa_6xsRlSPNqbvw/viewform , in e-mails to the LAA-HECAP mailing list (where it was requested that information was shared with e. g. younger members of their research groups that did not know about the association). As a result of this, currently (numbers checked with Arturo Sánchez Pineda) there are 586 in the list (that already appears on the laa-hecap webpage, <https://www.laa-hecap.org/>), which was also debugged to avoid repetitions and inactive e-mails. In this task we acknowledge the work of the Communications Committee, where Arturo Sánchez Pineda has helped us and Rogério Rosenfeld a lot. We plan to continue working similarly in the future, although we are of course open to new interesting ideas that can arise in the General Assembly of LAA-HECAP that will be held Nov. 7, 2024, as part of the XV Latin-American Symposium on High-Energy Physics (SILAFEA), <https://indico.nucleares.unam.mx/event/2125/> .

Plan for the next period:

- To continue inviting active members in HECAP topics of the LA community to join the association throughout the application link:
https://docs.google.com/forms/d/e/1FAIpQLSeY5pkzAMfmq-CjSlSdg3L3FZHTwMX667HHa_6xsRlSPNqbvw/viewform.
- To work in synergy with the Communication Committee and keep the list of associate members updated and public on the LAA-HECAP website <https://www.laa-hecap.org/> .
- To work in synergy with JEDI and Statistics Committees by sharing the database and interchanging data.
