---------------------------	---

30th International Cosmic Ray Conference

Friday 06 July 2007

OG 2.2 - Uxmal + Tulum (Holiday Inn) (08:30-10:06)

time	title	presenter
08:30	NON-THERMAL EMISSION FROM KEPLER SNR	KSENOFONTOV, Leonid
08:42	New VHE emitting middle-aged pulsar wind nebula candidates in the extended H.E.S.S. Galactic plane survey data	LEMIERE, anne
08:54	Morphological Studies of the PWN candidate HESS J1809-193	KOMIN, Nukri
09:06	Energy Dependent Morphology in the PWN candidate HESS J1825-137	FUNK, Stefan
09:18	Observations of Pulsar Wind Nebulae with VERITAS	KONOPELKO, Alexander
09:30	Observation of orbital modulation of the VHE emission from the binary system LS 5039 with HESS	DE NAUROIS, Mathieu
09:42	Report on VHE Gamma-Ray Observations of PSR B1259/SS2883 near the 2007 Periastron with the H.E.S.S. Stereoscopic System of Cherenkov Telescopes	KERSCHHAGGL, Matthias
09:54	Gamma-Rays Produced in Cosmic-Ray Interactions and the TeV-band Spectrum of RX J1713-3946	POHL, Martin
