# 30th International Cosmic Ray Conference

## Friday 06 July 2007

### **OG 2.3, OG 2.4 - Uxmal + Tulum (Holiday Inn) (12:05-13:30)**

time	title	presenter
12:05	Wide-range multiwavelength observations of Northern TeV blazars with Suzaku, MAGIC and HESS	HAYASHIDA, Masaaki
12:17	A Spectacular VHE Gamma-ray Outburst from PKS 2155-305 in 2006	BENBOW, Wystan
12:29	Snapshot Observations and Time-resolved Modeling of Gamma-ray Blazars during Major Flares	CARSON, Jennifer
12:41	Successful ToO triggers on the extragalactic sources with the MAGIC telescope	MAZIN, Daniel
12:53	Observations of Gamma-ray Bursts with VERITAS and Whipple	HORAN, Deirdre
13:05	Synchrotron emission in GRB prompt phase using a semi leptonic and hadronic model	GUIRIEC, Sylvain
13:17	The 'Supercritical Pile' GRB Model: Prompt and afterglow emission	MASTICHIADIS, Apostolos
