Multi-peak structure of the LPM shower in the dense media

Abstract content

The multi-peak structure of the LPM showers in the lead was firstly clarified in one-dimension by Konishi et. al. (See, E.Konishi,A.Adachi,N.Takahashi, Journal of PhysicsG,Vol.17(1991)719). In the present paper, we show multi-peak structure of the LPM shower in both the lead and tungsten in the three- dimensional way and discuss their characteristics in detail.
