## **Study for EAS hadronic component with hadrons energy $> 50$ GeV**

*Wednesday, 4 July 2007 14:45 (0:00)*

### **Abstract content**

EAS hadron number spectrum has been measured at EAS array “Carpet-2” for hadrons with energy  $> 50$  GeV. The spectrum can be described by a power law and exhibits a change in the integral spectral index from 1.8 to 3.1 at the number of hadrons equal to 30. The ratio of the number of muons with threshold energy 1 GeV to the number of hadrons has also been measured.
