Towards flavor physics from the heterotic string

Monday, 24 October 2011 13:00 (0:30)

Abstract content

In this talk, we shall study how heterotic orbifold compactifications can lead to an acceptable flavor structure, avoiding the constraints on flavor-changing neutral currents usually extant in stringy supersymmetric models. The natural appearance of flavor symmetries plays a crucial role.

Summary

Primary author(s) : Dr. RAMOS-SANCHEZ, Saul (IF-UNAM)

Presenter(s) : Dr. RAMOS-SANCHEZ, Saul (IF-UNAM)

Session Classification : Astroparticles, Cosmology, Strings and Beyond the Standard Model

Track Classification : Astroparticles, Cosmology, Strings and Beyond the Standard Model
