PASCOS 2012

Tuesday 05 June 2012

Neutrinos - Yucatán (15:30-16:55)

- Conveners: Prof. de Gouvea, André

time	title	presenter
15:30	Tests of Lorentz and CPT Violation with Neutrino Oscillation Experiments	KATORI, Teppei
15:50	The MAJORANA DEMONSTRATOR: Progress towards showing the feasibility of a tonne-scale ^{76}Ge neutrinoless double-beta decay experiment	FINNERTY, Padraic
16:10	Non standard interactions in the neutrino sector	MIRANDA, Omar
16:30	Constraining neutrinoless double beta decay	DORAME, LUIS

Neutrinos - Yucatán (17:15-18:15)

- Conveners: Prof. Hannestad, Steen

time	title	presenter
17:15	Low-energy neutrino-electron scattering as a Standard Model probe: the potential of LENA as case study	GARCES, Estela A.
17:35	A new neutrino mass sum rule from inverse seesaw	ROJAS, Alma D.
17:55	How to construct self/anti-self charge conjugate states for higher spins? (From neutrino to photon and all that)	DVOEGLAZOV, Valeriy
