Mario Rodríguez Cahuantzi

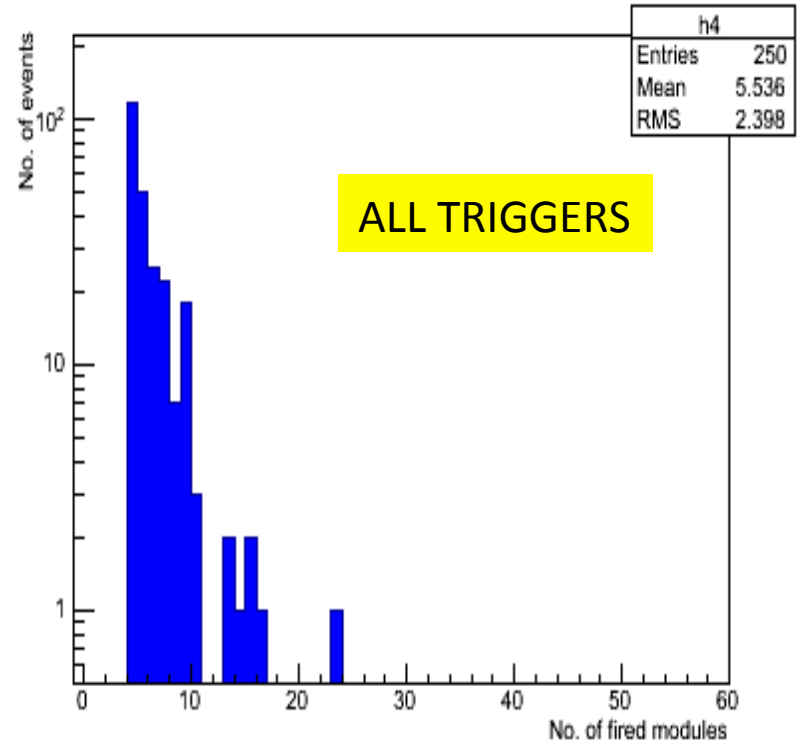

13 de Octubre de 2012

RUN 189410

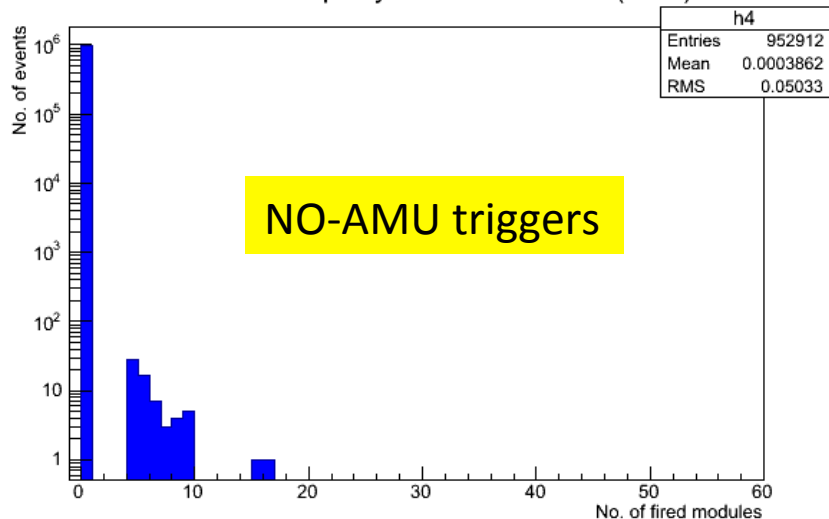

ACORDE - Single Muon Hits (MCN)

ACORDE - Multiplicity of Acorde Modules (MCN)

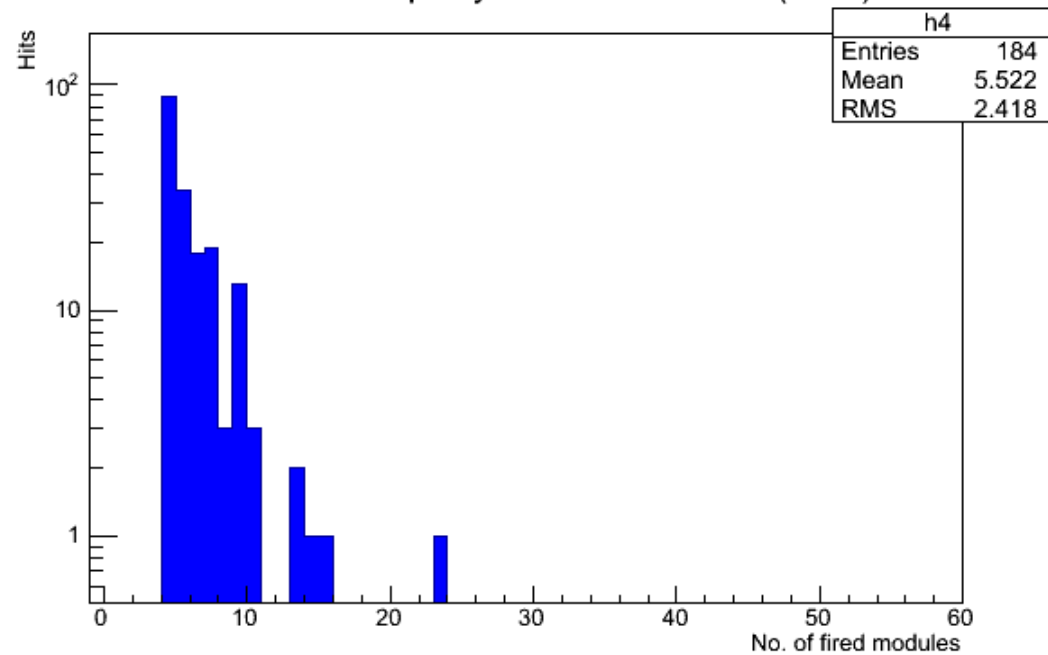

ACORDE - Multiplicity of Acorde Modules (MCN)

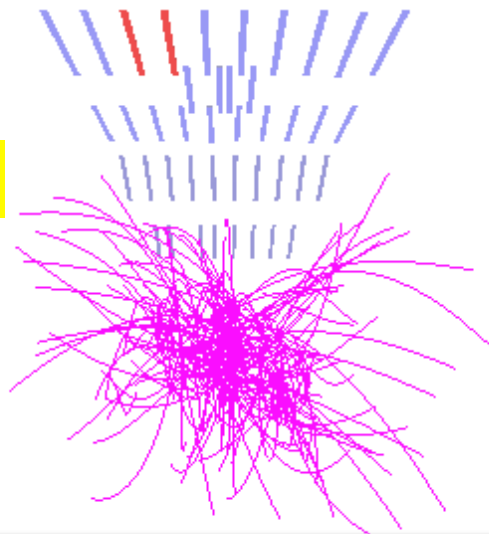

Many empty events due to the trigger of some other detectors

AMU TRIGGERS

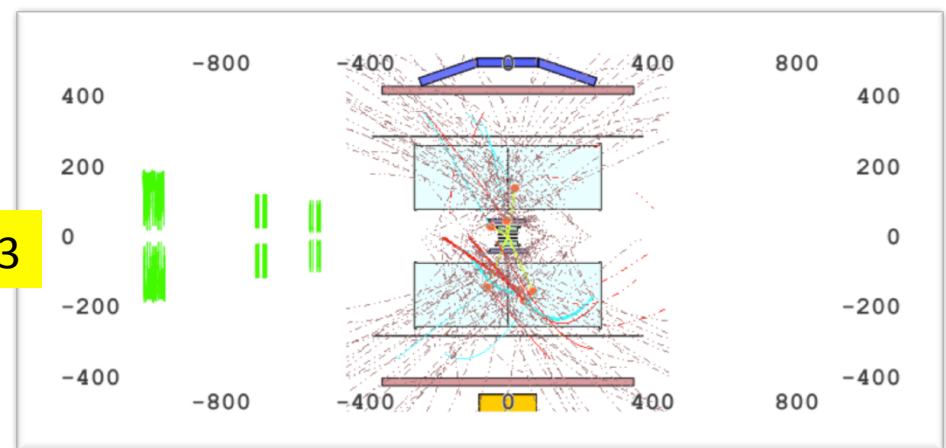

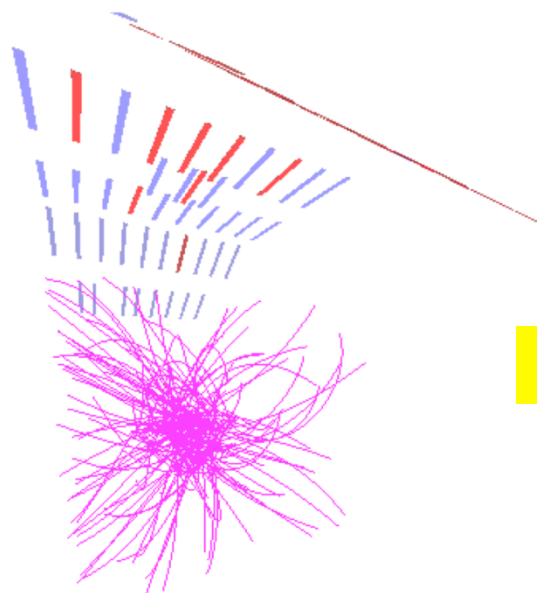

ACORDE - Multiplicity of Acorde Modules (MCN)

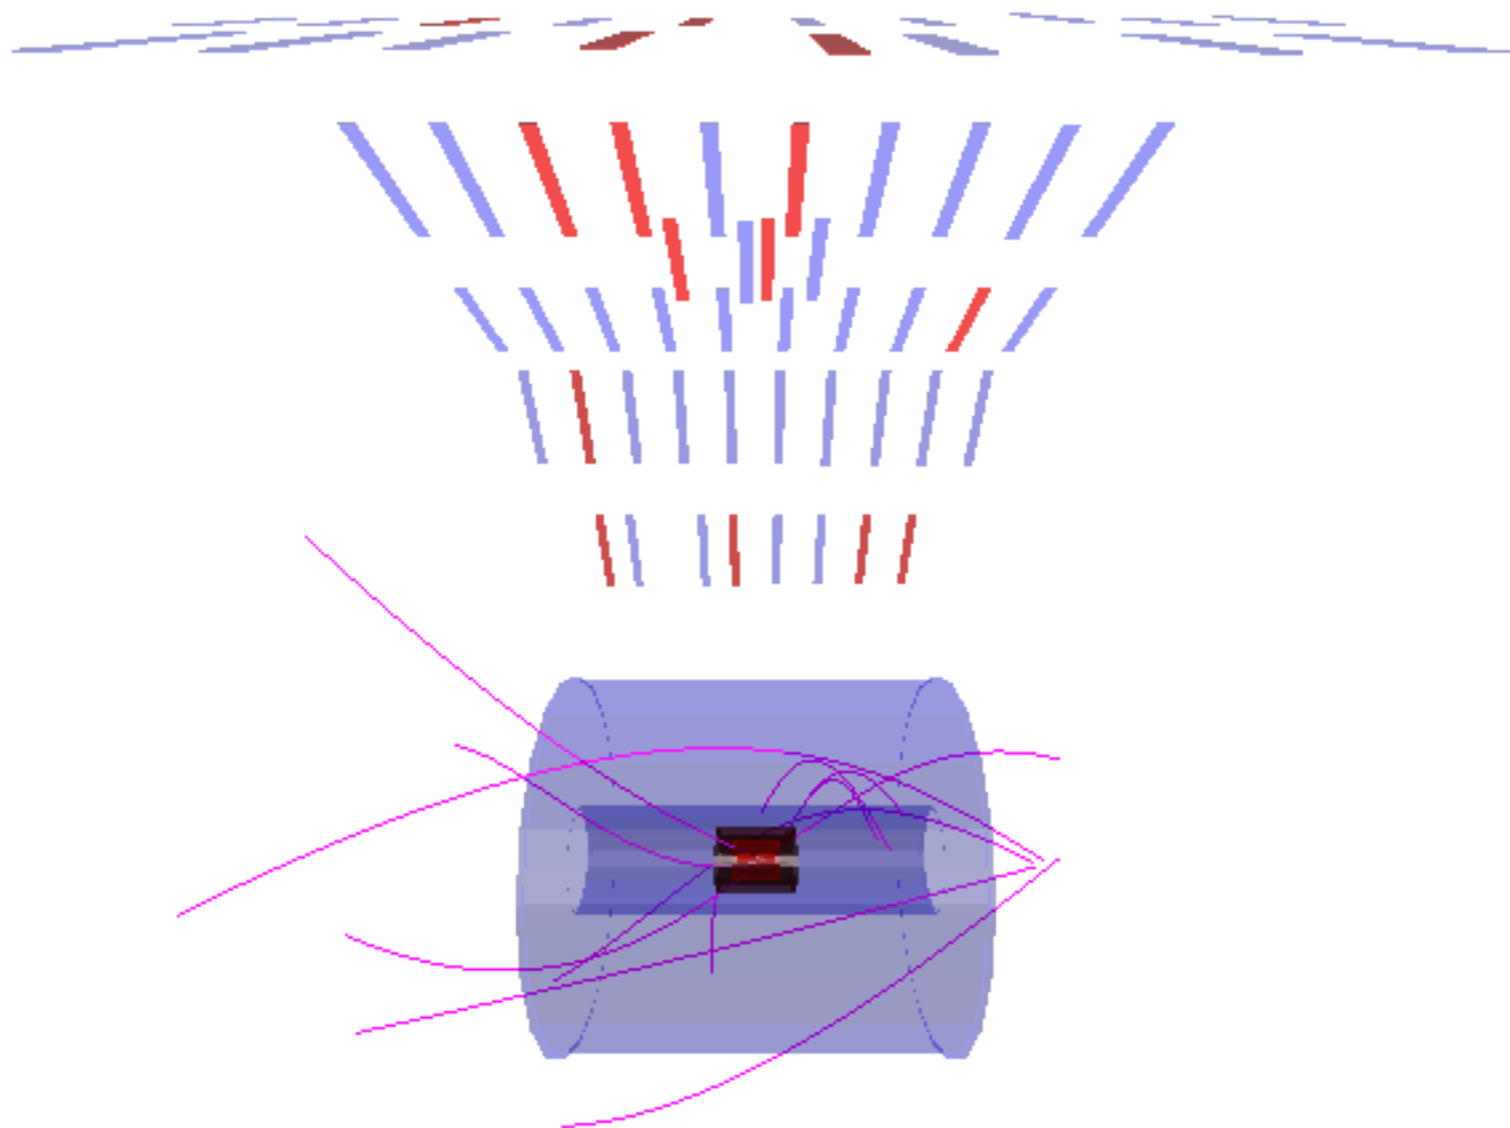

MCN=15

MCN=23

Not triggered by ACORDE

Summary

ACCORDING WITH MIHAI (EVENT DISPLAY EXPERT) WE CAN NOT DISPLAY THE EVENTS WITHOUT THE RECONSTRUCTION

From Evgeny: we suspect that empty TPC in the event display can be due to HLT data compression for TPC clusters which was introduced in the beginning of August. According to Gilda, we have ~10% of events stored with TPC clusters without compression which Mario might still see in the event display.
