Abstract content

Arteaga Juan Carlos High-energy neutrinos from FR II-type galaxies induced by gamma-ray interactions with the gas and dust at the source

Bello Héctor Sphericity measurement in proto-proton collisions en the ALICE experiment at LHC.

Bermudez Ramos Rocio Angelica Perturbative and Non-Perturbative complementary aspects in QCD

Bautista Irais, Wolfgang Bietenholz, Urs Gerber, Christoph Hofmann, Hector Mejia and Lilian Prado Evaluation of Numerical Measurements in Distinct Topological Sectors

Cortes Maldonado Ismael Study of the $Z_H \rightarrow \gamma H$ decay in the Littlest Higgs Model

Conde Ruben DAQ for High Energy Cosmic Rays Detection

CARPINTEYRO Severiano Quality Certification (QC4) for the RE4 upgrade of the CMS endcap system.

ESPINOSA GÓMEZ, David Constraining the $Z'bs$ coupling from the $B \rightarrow X_s \gamma$ decay

FERRO, Rodolfo Canonical quantization of spin 1 matter fields: Preliminary results

GARCÍA TECOCOATZI, Hugo Electromagnetic decays in Baryons

LARIOS, Francisco Top quark electromagnetic dipole moments

PONCE LANCHO Epifanio Transient Luminous Events observed with the pinhole camera from Sierra Negra Volcano in Mexico

Sarkis Mobarak Youssef Direct Search of WIMPs Dark Matter with CCD sensor

Toledano Ivan Monte Carlo simulation of Tetraquark and Meson mixing in a dynamical model of strong interaction

Summary
