Update in the QA fo High pT

Update.

Generating AliGenBox Samples of 0-200 GeV.

- ITS + TPC

- ITS TPC +TRD +TOF To compare directly with PD06

Using head 20 Nov 2007, and Pro version.

Repeat the analysis and put the results in the Note.

 - Cluster an PDC06 disks are functional, Installation of Proof this week with 2 disk of 500 Gb (Tuesdaty) . 1.5 Tb Storage will be ready soon (at least one week), Once I have the storage I will put PD07 data (One month). One disk only as data server other as keeper.

 - Disks will be mounted locally need to test.

 - OLDB service nned to be implemented not trivial

 - With this I can work over the PD06 data.

 - To put QA in the JetAn as it is not posible consume about 1 G of memory .
